

Astronomy Day Award, 2010

Cosponsored by *Sky & Telescope* and the American Astronomical Society

The Astronomy Day award began in 1980 and is awarded to the group(s) that best exemplifies the concept of Astronomy Day, "Bringing Astronomy to the People," through its special event program. The award is judged by the Astronomical League. For a list of past winners, go to <http://www.astroleague.org/al/astroday/astrowinners.html>

The rules are simple. They are:

1. All entries must be postmarked by June 13 of each year and received by June 19th (if via postal mail) or received electronically by June 13th.
2. Three primary prizewinner(s) may be chosen, one each for each population size category (\$150 each): Large, Medium & Small
3. Two secondary \$50 awards may be given as follows:
 - Best new idea
 - The organization that does quality events year after year (determined by previous entries)
4. Honorable Mention(s) may be awarded to those groups in final contention for the award.
5. Not all awards may be presented each year.
6. All entries will be judged on the following:
 - a. Originality and effort
 - b. Effectiveness of the sponsored events
 - c. Most productive use of local resources
 - d. Uniqueness of local events
 - e. Carrying out the primary theme of Astronomy Day (Bringing Astronomy to the People)
 - f. Carrying out any secondary annual theme that may exist
7. Eligibility is open to any nonprofit organization which promotes astronomy or space science. Planetariums and science museums, astronomy clubs, universities, and observatories or combinations thereof are all eligible. Organizations may not enter as part of a larger group and individually.
8. If submitting an electronic entry, ALWAYS check the Astronomical League's Astronomy Day web site for the correct e-mail address <http://www.astroleague.org/al/astroday/astroday.html> Electronic entries must be formatted in the same order as the entry form. Attachments must be able to be opened by MS Word and/or MS Photo Editor
9. All entries become property of the Astronomical League. Submitting photographs constitutes permission to publish and must comply with the guidelines under "Helpful Hints."

The winners will be notified by July 31, and awarded at the Astronomical League's summer convention. Since the 2010 convention is June 24-27, the winners will be announced at the convention.

Helpful hints for entering the award

1. Involving all astronomy-related groups in the area is viewed as very positive as well as promoting any special theme for the year (There won't always be a special theme).
2. Previous primary award winners must be extraordinary to win the same award again in subsequent years. However winning one award doesn't preclude an organization from winning a different award in the same or a different year.
3. Compose your photographs. Look through back issues of *Sky & Telescope* to judge what kind of photo they will publish. There is nothing wrong with posing a picture. Include a labeled hard copy (2 inches or larger) of any mailed digital image(s) and label all media with name of entrant. Also each photograph must be labeled with where, when, who took and who is in the photograph.
4. Edit video tapes. Label the length of the video pertaining to Astronomy Day (especially if there is other non-related video on the tape). Also if the Astronomy Day portion is not at the beginning of the tape, indicate how far into the tape the Astronomy Day portion starts. VHS only. DVD's (DVD Video format only) are also acceptable.
5. You will receive an acknowledgement of your entry (either by postal mail or e-mail). If you do not receive an acknowledgement, contact the Astronomy Day Coordinator.
6. You do not have to use this entry form, but you must format and order your entry in the same manner, i.e. your entry does not have to fit into the space provided but you must use the headings in the entry form (many entrants use a word processor to enter-which is quite acceptable) and all questions must be answered. You may include additional information at the end of you entry if it does not fit within one of the categories. This could include a summary. For electronic entries, scan (if necessary) and attach the required flyers to your entry.
7. Hosting the event on a different day than the "official" date will not preclude you from winning. Organizations hosting a fall Astronomy Day are eligible to enter next year's award
8. The contest will be judged by the Astronomical League and not *Sky & Telescope* (i.e. you can mention *Astronomy* magazine) or the American Astronomical Society.
9. A co-sponsor is an organization that helped in set up and planning. A participant is an organization who used space at your Astronomy Day event to promote themselves.
10. Postal mailing from outside the USA may take several days to arrive.

Good luck! If you don't win this year, please try again next year.

Entry Form for the 2010 Astronomy Day Award
Cosponsored by *Sky & Telescope* and the American Astronomical Society

Date of Entry:

Organization(s), institution(s), club(s), etc. entering the award:

Contact person:

Address:

City

State/Prov

Zip/Postal Code

Country

Web site:

Preliminary Information

(will not affect the judging of the award. We are just curious)

Did you list your event(s) on the Astronomy Day web site? YES NO

Did you held your event on a day other than the “official” date of Astronomy Day, and if so, why?

Suggestions on how the Astronomy Day Headquarters can assist you in Astronomy Day events:

What was the weather like during you Astronomy Day events (e.g. rainy, completely cloudy, very clear, etc.)?

Is any sponsoring organization a member of the Astronomical League (does not affect the judging of the award)? Which one(s)?
