SIGN UP NOW FOR HARVARD PLATE PROJECT

Sign up now for the Harvard Plate Project as described in the President's column of the December *Reflector*. We will schedule an online training session in the next few weeks, so please contact me at president@astroleague.org if you would like to make a meaningful contribution to science with this project.

The process requires perusal of the .jpg images from the original telescope logbooks used for each telescope to transcribe the appropriate and necessary information that will allow the scanning of each plate. This usually consists of transcribing the RA, Dec, Start time, Stop Time, Hour Angle, Date, and occasional comments that are associated with each plate. Several League members have already signed up. **Please contact us by December 31 if you want to be part of this special project.**
