Yes. Apple has unified their gift cards. A standard Apple Gift Card can be used for products, accessories, apps, games, music, movies, TV shows, and iCloud.

Are there legitimate code generators?

No software can "generate" a code that validates with Apple's servers unless it has been purchased or issued by Apple. Legitimate sites distribute existing codes that have been paid for by sponsors. Avoid any tool that claims to hack the Apple database.

Do these free codes expire?

Once a code is redeemed to your account, the balance does not expire. However, the promotional code itself (the 16-digit string) may have an expiration date if it was part of a specific marketing campaign, so it is best to redeem them immediately upon receipt.

It depends on the site. Stick to reputable aggregators and promotional pages. Never download executable files (.exe) or provide your Apple ID password. Legitimate pages will only ask for a basic email or simple participation.
