

What's Up, Doc? †

August 2024 (Central Daylight Time)

Dr. Aaron B. Clevenson, Observatory Director, Insperty Observatory

This document presents those objects are visible this next month for many Astronomical League Observing Programs. If you are working on a more advanced program, I assume you are tracking where your objects are all the time. It concentrates on the common and starter level programs. This is based on 9 PM Central Daylight Time at about 30° North Latitude (Houston, TX)..
