

## **Your Astronomical League Just Gave Away Six Library Telescopes**

In 2025 the Astronomical League again offered a free Library Telescope to a lucky Astronomical League club in each region, plus one to a Member-at-Large.

The Library Telescope consists of a 4.5-inch Dobsonian reflector fitted with a zoom eyepiece – or equivalent. The value of this opportunity is approximately \$325; the potential is enormous.

The Library Telescope Program was initiated over fifteen years ago by the New Hampshire Astronomical Society and has grown into a nationwide presence. Clubs donate an easy-to-use portable telescope with both quality optics and a sturdy mount to their local library. Patrons can then check it out as they do books.

### **Congratulations to these 2025 winners!**

GLRAL	Evansville Astronomical Society
MERAL	Amateur Astronomers Association of Pittsburgh
MSRAL	Kansas Astronomical Observers
NCRAL	Twin City Astronomers
NERAL	Amateur Observers' Society of New York
NWRAL	Island County Astronomical Society

**The 2025/2026 Library Telescope drawing cycle  
begins in January 2026!**
